Received letter from Chief Marketing Officer, Lailen Consultation Private Limited regarding proposal for Upgradation, Modernization and Digital Integration of the Existing Conference System within Public Works Department.

The proposal consist of two part i.e i. LED Display (Four different sizes with price) and ii. Smart Display. (Two different sizes with price)

- i. **An LED display panel is an electronic screen that uses Light Emitting Diodes (LEDs) to display text, images, and videos. These panels are widely used in TVs, digital billboards, stadium scoreboards, advertising screens, and even small indicator displays.**
- ii. **A Smart Display Panel is an interactive or intelligent screen that can show multimedia content, connect to networks, and often allow touch or voice interaction — much like a “smart TV” or “interactive flat panel” used in classrooms and conference rooms.**

Unlike a regular LED or LCD screen, a smart display has an **integrated processor, operating system (like Android or Windows), and wireless connectivity.**

The existing Conference System we have at present is Mini Conference Hall which is equipped with Video Conference System through Computer Processing Unit (CPU) with audio/visual input and output plus annually paid Webex Video Conference application, the amount of Rs. 24,000/- is paid from PMGSY Admin fund.
